Logitec Plus - DB40

Reliable, High Quality Bale Processing

The Big-bale DB40 provides a perfect solution for processing compressed big-bales of up to 2.6m high.

The DB40 brings back the original volume of the substrate to what it was before compression, without affecting the structure of the substrate. The DB40 is easy to move with a pallet jack or forklift. It is also low on maintenance and can be equipped with many options to make production easier and more efficient.

The DB40 is compatible with almost all brands of potting machines and fillers.
