

Filling

Mayer - RM-2120 Bark Topper Machine

BENEFITS:

- Adjustable for various pot sizes
- Evenly distributes materials in pots
- Reduces growth of moss and weeds
- Excess material is redistributed for re-use
- Can be combined with a other machines for a full automation line
- Can be configured to receive pots from either the left or right side of machine

The Mayer RM-2120 utilizes parallel belts to rotate pots as they advance through the machine; resulting in an even distribution of materials in each pot.

An additional vibrating unit ensures that excess material is pushed back into the hopper and any persistent residue is removed by two spring-loaded scrapers. The frequency-controlled motors are able to be continuously adjusted as needed to adapt to various pot sizes.

Key Features:

- Uniform distribution of materials every time
- Can be adjusted to accomodate various pot sizes
- Choice of left side or right side incoming pot configuration
- Vibrating unit to redistribute excess materials back into hopper

Technical Specifications:

Pot Size	7 1/2" - 15 3/4"	19 - 40 cm
Pots Per Hour	Dependent on the attached filling machine	
Hopper Capacity	1.3 yards ³	1,000 liters
Transport Dimensions	8' - 2" x 4' - 3" x 6' - 6"	2.5 x 1.3 x 2 m
Weight	716 lb	325 kg

With over 20 years in the horticulture business, Bellpark Horticulture is a trusted name in Horticultural Automation Solutions. Serving growers in Canada and the United States, the Bellpark team strives to provide customers with the highest quality solutions.

Our sales and project consultants realize that each grower is different and that each project requires a personal level of attention to detail to ensure its success.

Our service team is committed to offering our customers the highest level of service with the quickest response time. With a dedicated parts and service department, our factory-trained technicians are available when you need them.

■ mayer

Since 1967 Mayer has been setting new standards in the green sector with their leading innovative automation solutions for ornamental plants and tree nurseries. They develop, produce and sell quality automation solutions for substrate preparation and for filling pots and trays.
